

Masias Maquinaria SL

*Köln, GERMANY
25-28 May 2011*

Dear Customer

We would like to inform you that once more we will be participating in the most important Machines and Accessories International Exhibition for the Mattress Industry, INTERZUM 2011.

As usual all our displayed machines will be in running conditions showing the process from the raw material up to the end product.

This year we will exhibit the following:

- **Waste foam cutting machine to get regular foam sticks without dust.**
- **Shredder to recycle all your mattress panels quilted waste.**
- **Virgin polyester fiber opener.**

The above 3 machines will feed a blending line enabling to get the needed proportion of each material and get them homogenously blended.

The virgin Polyester fibers or the blended materials will feed the following lines:

- **One high loft polyester fiber pad formation line without any chemical or heating process to get rolls to feed multi or mono-needle quilting machine.**
- **One full automatic machine to fill pillows and multi-sector cushions used in the Sofa industries.**

WE HOPE TO HAVE THE PLEASURE TO SHOW YOU ALL THE SAVING AND QUALITY ADVANTAGES YOU CAN GET FROM THE ABOVE LINE IN HALL 9.1 STAND B40-C41.

We kindly ask you to confirm you visit and we remain at your disposal for any further information you may need.

Best regards,

Esmeragdo & Luis Masias, Alan Amer, Pedro Collell, Sonia Ortiz

and all Masias team.
